

# *Case Study – Town Mill*

*Domestic scale micro-hydro  
installation at historic  
mill site*

ern Renewable Energy

- *Existing mill with wheel in good condition*
- *Salmonid river with existing abstraction license*
- *5m of fall*
- *Owner required design, specification and system installation*
- *3kW output*

- Turbine located in compact underfloor location
- Very quiet operation was important
- New WRE automatic stainless steel screener used in restricted location
- Ecowave crossflow
